

# Your residents pay the rent. Centro turns the building itself into Net Operating Income.

RESIDENTIAL (MDU)

You have invested in the asset, the amenities and the lease-up engine. Centro is the connected layer that activates that investment — captured fees, reduced turnover, faster lease-up, lower operating costs.

Every paid amenity, visitor service and concierge touchpoint is fee revenue Centro captures via in-app discovery + payment. Incremental — not cannibalised rent.

Adoption % shown is **incremental** — share of occupied unit-months or residents where Centro generates a transaction that wouldn't have happened otherwise, not total uptake of that service.
