

Centro System Manager for Crestron®

Management software for Crestron Home® and Crestron Custom installations. An on-prem application, embedded on Crestron enterprise infrastructure, to monitor, control and schedule rooms, spaces and sub-systems across buildings, managed communities and commercial sites.

The missing line on your Crestron proposal

YOUR PROJECT

Crestron lighting, HVAC, shade and scene control.

Hospitality suites, villas and resorts.

Residential apartments and managed communities.

Commercial tenancies, serviced offices and mixed use spaces.

Crestron Home. Crestron Custom.

THE BRIEF

Facility managers and the integrator need **visibility, alerts and administration** for systems distributed across the site.

The operations team wants to **see, control and schedule** every location from one place.

Guests, residents and tenants need **direct access** to the spaces they're using, **without downloading an app**.

PROJECT · BRIEF · SOLUTION

THE SOLUTION

Monitoring, email notifications and event history for every processor on the site.

In-browser operations dashboards and schedule management of controlled objects across every location.

User apps for accessible control of each location, opened on any phone, tablet or touch screen through time-limited QR links.

*"Your proposals require building management solutions to **answer the scope** and **complete the project**."*

FOUNDATION

System Manager

Monitoring, notifications and administration

Always Free

CENTROSM

LICENCE

Manager

Location dashboards and schedules

\$2,500 USD MSRP

CENTRODASH

LICENCE

User App

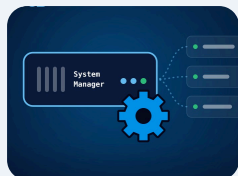

User controls on phones, tablets and touch screens

\$2,500 USD MSRP

CENTROAPP

THE LICENCES

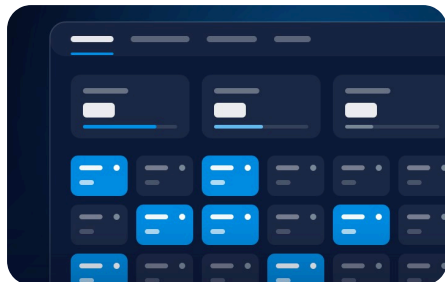

One for the operators, one for the occupants.

INCLUDED ON EVERY PROJECT CENTROSM

System Manager Always Free

The foundation on the Crestron processor: network discovery and monitoring, diagnostics, email alerts, restore points and encrypted backups. It runs the Manager and User App licences.

CENTRODASH

Manager Licence**\$2,500** USD MSRP

Location dashboards and schedules

Site infrastructure overview and schedules for facility managers and operations teams. Status, notifications and control for every connected location, from one place.

- ✓ Overview and detailed per-location notifications, occupancy, service state, scene, climate and lighting
- ✓ Dashboard views, grouped locations, filters and multi-selection object control
- ✓ Self-managed schedules for any location control object, at set times or repeating intervals

CENTROAPP

User App Licence**\$2,500** USD MSRP

User controls on phones, tablets and touch screens

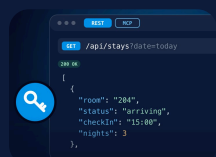

A User App for mobile devices and touch screens in every location. Quick connection to the control, status and notifications of that location for whoever is using it, with nothing to install and nothing to set up.

- ✓ Per-location control, status and notifications for the guest, resident or tenant in that space
- ✓ Printed and limited-session QR codes issued from manager dashboards and in-room touch screens
- ✓ Configurable appearance and branding, plus per-location user app permissions and controls

WHERE NEXT

Take the site further

API Access and Centro Cloud connect the building to the business. Link System Manager to your PMS, including **Oracle OPERA Cloud, OPERA 5, Mews and Apaleo**, so stays, arrivals and room status reach every location.

REST MCP

API Access CENTROAPI

REST and MCP access for systems and stays. Connect your systems to every location.

MULTI-SITE 300+ LOCATIONS

Centro Cloud

Connect System Manager to the cloud for multi-site estates and the full Centro guest platform.
